Controller for LED strips IR 44 programs 72 W

Professional and high quality driver allows you to remotely control lighting based on LED products such as tapes. It has 44 programs (e.g quickly flashing colors, slow change of colors). It enables wireless change of colors, programs and light intensity. It is also possible to set any color (by mixing the primary colors).

Technical description

Application	**inside**
Certificates	**CE**
Maximum load	**72 W**
Number of programs	**44**
Remote control type	**IR**
Voltage	**12 V**
